CARE FOR WORK ENVIRONMENTS®

Trade Winds®

SE-500® ODOR ELIMINATING TECHNOLOGY

Trade Winds® aerosols are powerful odor neutralizing sprays designed to provide complete elimination of foul odors. Unlike many spray products that simply mask foul odors, Trade Winds contains SE-500 odor neutralizing additive to target and eliminate foul odors. SE-500 neutralizes malodors by binding to odor-causing molecules. Foul odors are removed and replaced with a pleasant fragrance for your facility.

COMPLETELY DRY SPRAY

Trade Winds is a dry aerosol that will not leave any messy residue on floors and surfaces. It will not create a slip hazard and is completely safe for use on fabrics.

COMPLETE FRAGRANCE PALETTE

State offers a complete palette of popular fragrances so you can choose a scent that complements your facility. Each fragrance is highly recognizable and suited for a wide variety of application areas.

AIR QUALITY ENHANCEMENT SERVICE

Trade Winds is designed to be a daily maintenance addition to your odor control program. Your State Chemical Account Manager can recommend a combination of odor solutions that address your needs.

DIRECTIONS FOR USE

Spray Trade Winds wherever odors occur. Allow a few seconds for the SE-500 odor neutralizer to combine with the foul odor molecules. Apply a few short bursts of Trade Winds aerosols for complete odor neutralization. Apply as needed or as a daily air deodorizing addition to your air quality enhancement program.
